In article <CozFJq.ELu@news.ess.harris.com> Steve Willingham,
swilling@harris.com writes:
>The R1 is virtually new. Purchased from Grove last Christmas for \$459.

**After checking my records, I realized I only payed \$449 for the basic
unit, not \$459 as previously stated. So I've adjusted my asking price
accordingly:

I have recently passed my amateur radio Tech Licence exam and I will need

to sell my R1 (which I dearly love) in order to buy a dual band
tranceiver. Can't understand it, my wife just won't let me tie up more
than a thousand dollars in radio equipment :-).

The R1 is virtually new. Purchased from Grove last Christmas for \$449.
It is still under manufacturers warrantee and includes a spare
registration card to register the new owner. Internal batteries have had
about 6 charge cycles on them. The unit is in perfect condition with the
original box and includes the following accessories:

Standard:

- Handstrap
- Antenna (FA-4B)
- Wall charger
- Belt clip

Extras included:

- BP-90 battery pack w/ 6 AA replaceable Ni-Cads (retail \$19 + bat cost),
- Protective Leather case fitted to R1 with BP-90 attached (retail \$19).

I won't waste time listing the R1's extensive array features, but anyone
with questions is welcome to contact me. I'm sure everyone knows the R1
receives cellular with no modification needed.

TERMS: Price for the whole package: \$ 435 + shipping, COD-Cash,
I will pay shipping insurance.

Thanks, and sorry for the original price error...

Seems like this could be used to drive a transverter. It would
be nice to have more than 2mhz of the band to transmit with in this case.
Can the HTX-100 be modified to do this?

To: ham-equip@ucsd.edu

For those of you who were asking a couple of months ago about getting a chest harness for your HT, I just saw a note in May 1994 QST on p.89 about the chest harness and a belt harness. It's \$29.95 for the chess harness of the type ski patrol uses.

Hi,

I just purchased a Johnson Transcom II which I want to convert to packet. It was a top of the line unit in its day - 30-40 watt two meter unit built very well. It was ment to compete in the 70's with Motorola better mobile units.

If anyone has any info on the above please let me know. Also I used to be on a mailing list which I believe was land-mobile. This list was for generally used by commercial service personel. I have since had my name taken off the list and also deleted how to get on the list. If anyone knows how to get put on the server for this list please forward that info to me.

Thanks

The local contest guys always debate what's the best contest rig for SS
etc. I was going to compile a list and send to one of the hamradio companies
(*NO* I don't work for one of them), then I thought why not get the views
of the world here via News!

So.... your views please!

Does anyone have a manual for a Wilson 1402 HT that they would be willing
to sell or photocopy??

Thanks in advance.
Marty
